

2016 PREA ANNUAL REPORT

Agency Overview

Average Daily Population: 268

Bookings: 7106 Males: 5281 Females: 1825

Average Length of Stay: 13.78

Agency Achievements

Douglas County Sheriff's office took the following actions in order to continue best practices for compliance of the PREA Standards:

- In February Classifications revised the custody assessment to include detailed information of in custody assaults reported during the interview. The information recorded includes which sergeant was notified, which mental health staff, the jail incident number and the notification of the PREA Coordinator. This process ensures the immediate investigation into the allegation.
- In April, 2 agency detectives attended the PREA Investigators course presented by Rubicon Training Group LLC.
- All PREA investigations are electronically stored in the New World Systems booking file associated with the inmate. These files are locked and only accessible by agency command staff. Hard copies will be destroyed following the guidelines of Colorado Revised Statutes.
- Douglas County Sheriff's Office website provides information on how to report a suspected incident of sexual abuse or harassment of a person while in custody. An email link along with contact information for the Sheriff's department is located in the Health, Welfare and Safety of Inmates section.
